

MASTERGRAIN™

REDEFINE YOUR DOOR

BEAUTY IS SKIN DEEP

Redefine Your Door

In 2008 Weber Manufacturing Technologies Inc., a Midland, Ontario, Canada-based tooling company, set out to leverage their proprietary Nickel Vapor Deposition (NVD) technology to completely revolutionize how fiberglass entry doors are made. NVD technology provides a unique way to capture fine, surface grain and sub-texture details, found on wood, leather and other materials.

Weber developed a complete offering of fiberglass door designs and fiberglass clad components. The products were branded MASTERGRAIN™ and the company began selling doors across North America. To create a MASTERGRAIN woodgrain door system using NVD technology, a silicone cast of a real wood door is formed and put into a deposition chamber to produce a nickel shell. The nickel shell is used to mold the fiberglass skins that are used on all door slabs and components. Other technologies can replicate woodgrain for fiberglass door production, but none can compare to the intricate, realistic and beautiful detail of a MASTERGRAIN door.

Today, Weber also uses NVD technology to create tooling and finished products for some of the world's most luxurious automotive, aerospace and building products brands.

Contemporary Cherry Engraved Cigar | C125 | Cigar

DOORS THAT PERFORM AS BEAUTIFULLY AS THEY LOOK

Milo | Contemporary Edge Smooth Engraved | E955 | Distance

MASTERGRAIN™ products can replicate, with fine detail, woodgrain and texture right down to the knots and swirls that give a wood door its unique character and charm. Components come together seamlessly to create luxurious, durable, high-quality doors that distinguish a home's exterior from a distance and completely adorn its interior. Beyond its striking appearance, you will find a MASTERGRAIN door has a robust build quality that delivers energy and performance criteria that is best-in-class in the door industry.

The difference is found in the design and engineering, in the quality of the materials used and finally in the state-of-the-art manufacturing process. MASTERGRAIN is the only door brand in the industry to offer fiberglass clad components to improve both appearance and performance. Door skins are made thicker than industry standard to provide more strength to better resist dents, dings and scratches. In addition, composite materials are used for many of the door slab and frame components to eliminate twisting, warping, mold and rot.

The high-density polyurethane foam core provides best-in-class insulation and is chlorofluorocarbons (CFC) free. There is more to a MASTERGRAIN door than meets the eye, although what meets the eye is extremely beautiful. Explore this product catalog to find out which MASTERGRAIN door is right for you.

A TRUE ENTRY DOOR SOLUTION

What sets MASTERGRAIN™ apart? It's the commitment to quality and investment in world-class manufacturing technologies. Every MASTERGRAIN woodgrain fiberglass door is built with fiberglass cladded components in order to deliver a finish that is seamless, strong and completely stainable. The result is a versatile door that flawlessly replicates the look, texture and aesthetic of real wood.

- 1 Molded Fiberglass Door Lite Frame**
A patented clip assembly system is employed to eliminate the need for unsightly screws and plugs. It creates a unique look that is completely seamless.
- 2 Polyurethane Foam Core**
High-density, CFC-free polyurethane foam is injected into the slab core to offer superior insulation, energy efficiency, sound-dampening and resistance to dents.
- 3 Composite Rails**
Rot-resistant composite (wood fibers and plastic film) are used for both the top and bottom rails. This material is resilient and more stable than wood or other materials.
- 4 Simulated Divided Lites (SDLs)**
Made with molded fiberglass to provide countless customization options, SDLs can be used in any design configuration as well as stained to match door panels and other components.
- 5 Sidelite Composite Glass Stop**
Matching composite glass stops, made with or without woodgrain, are installed on the inside of the door lite frame to hold glass securely in place, deliver improved performance and durability and make removal/replacement easier.
- 6 Engineered Wood Stiles**
The door stiles on the interior of the fiberglass slab are wider than industry standard and are uniform on both sides of the door. This unlocks more hardware opportunities and provides homeowners with a robust and kick-proof panel. The hardwood cap on the outside of the stile delivers a square edge that can be stained to match the fiberglass skins. This delivers the look of a premium door.
- 7 Composite Reinforced Mull Post**
Composite core components with aluminum reinforcement routed into door headers offer increased security and strength. Plus, fiberglass cladding adds ability to stain and match all door components.
- 8 Composite Jambs with Woodgrain Fiberglass Cladding**
All jambs are made using composite material. Woodgrain fiberglass cladded jambs are offered to attain a completely seamless look as they can be stained.
- 9 Brickmold with Woodgrain Fiberglass Cladding**
Available in a variety of sizes and finishes, this fiberglass-cladded brickmold is used as an aesthetic casing. It will not rot, split or warp and is completely stainable for a beautiful and seamless aesthetic.
- 10 Door Skins**
Nickel Vapor Deposition (NVD) technology, a process exclusive to MASTERGRAIN, is used to mold the world's most realistic fiberglass door skins of various woodgrains and thickness.

BUILT TO LAST

Every MASTERGRAIN™ door is engineered and built in North America by skilled technicians to ensure the highest quality. Unlike other doors, the manufacturing processes and technologies which MASTERGRAIN employs, eliminate the need to compromise between strength and lasting beauty.

MASTERGRAIN fiberglass doors:

- Do NOT warp, rot or crack like wood doors and requires less maintenance
- Do NOT rust or dent like steel doors
- Have seamless grain and stain matching across fiberglass components
- Are engineered for the extreme hot and cold temperatures of North America

STRENGTH

A pair of robust 4-1/16" stiles run down each side of the door slab. The stiles are made of 3-7/16" engineered wood and a 5/8" hardwood cap.

HIGH DEFINITION

To produce the most realistic woodgrain fiberglass doors, it starts with a high-quality real-wood door. Using our exclusive NVD technology we replicate the organic grain from the door onto a nickel tool. The tool is used to press a fiberglass skin with a minimum thickness of 0.090". To accommodate metal inlays and routed designs we press a 0.175" thick skin.

PERFORMANCE

All of our doors are insulated with high density, CFC free, polyurethane foam. Our formula improves energy efficiency and sound abatement.

CONSTRUCTION

Doors are constructed using rot resistant composite top and bottom rails.

MOLDED FIBERGLASS DOOR LITE FRAMES & SIMULATED DIVIDED LITES

MASTERGRAIN™ molds their own patented woodgrain and smooth fiberglass door lite frames that use a clip assembly system that eliminates the need for unsightly screws and plugs to deliver a unique uninterrupted look. MASTERGRAIN also offers molded fiberglass simulated divided lites (SDL).

- Fiberglass frames are more rigid than plastic frames.
- Molded door lite frames ensure a tight weather seal to the door and minimizes distortion.
- Plugless frame system eliminates all unsightly screw holes and plugs for a clean aesthetic.
- Traditional plugged door lite system uses screws and plugs to deliver certified performance for impact, air and water.
- Molded fiberglass SDL bars provide an energy-efficient way to create a number of design configurations for a completely custom look.
- Door glass frames and SDLs can be stained to match door panels and all other MASTERGRAIN door components for a seamless beautiful aesthetic.

SDLs come pre-taped and notched to create a beautiful lap-joint

Engraving stops before door edge for air and water protection.

Not all engraved designs offered in 7' height. Check pages 66-75 for details.

*Also available in 30" width x 7' height and 0.175" thick skins
*** 30" and 32" width available for special order

2-1/4" slab thickness available for 8' doors without glass. Only available for 36" x 8' and 42" x 8'.

Custom design options are available. Subject to engineering review.

SIZING

Heights: 6'-8" 7' 8'

Widths: 32" 34" 36" 42"

Sidelites Widths: 10" 12" 14" 16"

10" flush panel sidelites available.

*Not engineering drawings. For reference only.
